

August 6, 2014

To whom it may concern:

I have had the good fortune of working with Charlie Dupuis prior to his startup of Steam Turbine Services. Charlie's talented service, coupled with technical expertise and years of knowledge have been key factors in providing SECI with the successful completion of multiple 650-megawatt steam turbine rebuilds.

Today Charlie continues to serve our company with valuable technical insight into various complex turbo-generation related issues. Most recently, he has benefitted us by offering precision measurement, and hands on technical training for our Mechanical Maintenance department.

People or companies that provide professional services in the field of turbine and power generation repair, however, do not easily impress me, it is my pleasure to say that I am very impressed with Charlie Dupuis, and I happily recommend him and his company to any one in need of the services they provide. If you would like to speak with me regarding this recommendation, please contact me at your convenience.

Sincerely,

Bert Chambers
Mechanical Maintenance Supervisor
