

Letter of Recommendation for Steam Turbine Services

Date: November 19, 2014

To Whom It May Concern:

I strongly recommend Steam Turbine Services (STS), in particular Charlie Dupuis and Jeff LePage.

I have hired STS several times for outage preparation, planning and project management. Every time their assistance has paid dividends in overhauls which have come in on time and under budget. They have provided great advice and friendly professional service. They provide daily written progress reports through the outage as well as follow up recommendations for future outages.

We appreciate their effort and expertise in the preparation and management of our turbine projects.

If you would like to speak with me regarding this recommendation, please contact me at your convenience.
